Samuel Sulai

**To: The Hiring Manager,
Suburban Fiber Company**

I am a highly motivated, result-oriented individual, willing to go an extra mile to reach goals and **learn along the way**. For example, my last job involved meeting specific targets on a daily basis, which i managed and sometimes surpassed while gaining better and effective means of improving the achievement of those goals. I'm confident that if given this opportunity, i will thrive and deliver quality work within stipulated deadlines. i look forward to contributing my skills and experiences if given the opportunity.

I am a self-motivated person who is willing to go above and beyond on any project irrespective of the languages/frameworks used, and to learn valuable skills on my own time. For example, I had to swiftly jump on a react.js framework due to the fact that it was needed for a particular project, simply out of a passion to see things accomplished/achieved. I know you are looking for a self-motivated software developer with both skills and passion, and I am that person.

My few years of experience in this field have given me on-the-job knowledge, as well as a sense of where the industry has been and where it's going in the future. I have the kind of technical skills that only come from doing the job for few years. I can slide seamlessly into this role and start hitting goals on my very first day.
